DETAILED ACTION

Claims 16-23 are under examination on the merits. Claims 1-15 are canceled.

Priority

It is noted that applicant refers to some priority documents in page 1 of the specification.

However, said reference is not complete. Applicant is advised to refer to all related applications in order to complete the priority data of this case.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16, 17, 22-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Tokai et al. (EMBO J., 15, 457-467, 1996, cited in the IDS). Tokai teaches a DNA sequence that encodes SEQ ID NO:2 of this invention completely (see the attached alignment), anticipating claims 16-17. In pages 464-465 Tokai teaches about plasmids and host cells comprising its DNA sequence, anticipating claims 22-23 of this invention.

Allowable Subject Matter

Claims 18-21 are objected to as being dependent upon a rejected base claim 16, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. This is because isolated nucleic acids having sequences set forth as SEQ ID NO:1, 3, 5 and 7 are free of prior art. Further the

Art Unit: 1652

prior art does not teach or suggest preparing such specifically claimed DNA sequences. Hence said sequences are also non-obvious.
